Patient	Last Name	First	MLL	Soc. Security #	Birthdate
---------	-----------	-------	-----	-----------------	-----------

Please answer the following questions about your vision history:

- Do you currently wear glasses? Yes  No  If YES, how long have you had your latest glasses? \_\_\_\_\_
- Do you wear contact lenses? Yes  No  If YES, what type?  Soft  Hard What brand? \_\_\_\_\_
- How often do you replace your lenses? \_\_\_\_\_ Overnight wear Yes  No
- Have you had laser refractive surgery? (LASIK, PRK) Yes  No  If YES, list date \_\_\_\_\_
- Are you required to wear protective eyewear? Yes  No  If YES, for what reason?  Occupation  Sports  Monocular
- Are you having difficulties with your current vision? Yes  No  If YES, what type?  Check all that apply  Distance (e.g., driving)  Near (e.g., reading)  Intermediate (e.g., computer screen, arm's length)  Driving at night  Others \_\_\_\_\_

Please answer the following questions about your medical status and history:

- Have you ever been treated for any medical condition? (e.g., diabetes, high blood pressure, arthritis, etc.) Yes  No  If YES, list date \_\_\_\_\_
- Have you ever had any eye disease? (e.g., glaucoma, cataract, wandering or "lazy" eye, retinal detachment?) Yes  No  If YES, please explain \_\_\_\_\_
- Have you ever had any surgery? Yes  No  If YES, please provide date and reason \_\_\_\_\_
- Have you ever been hospitalized? Yes  No  If YES, please provide date and reason \_\_\_\_\_
- Do you take any medications? Yes  No  If YES, please list \_\_\_\_\_
- Do you take any eye medications? Yes  No  If YES, please list \_\_\_\_\_
- Do you have any drug or food allergies? Yes  No  If YES, please list \_\_\_\_\_

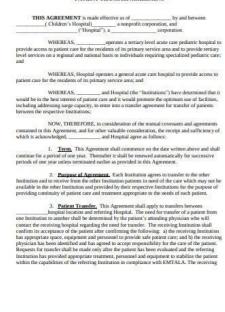

Review of Systems

Yes  No  If YES, please explain \_\_\_\_\_

- Do you currently have any of the following problems?
- Chronic pain (e.g., back pain, joint pain, fatigue) \_\_\_\_\_
- Ear/nose/throat problems (e.g., hearing loss, sinus problems, sore throat) \_\_\_\_\_
- Heart problems (e.g., chest pain, irregular heart beat) \_\_\_\_\_
- Respiratory problems (e.g., shortness of breath, wheezing, coughing) \_\_\_\_\_
- Gastrointestinal problems (e.g., heartburn, abdominal pain, diarrhea, vomiting) \_\_\_\_\_
- Urinary problems (e.g., pain, difficulty urinating in men) \_\_\_\_\_
- Skin problems (e.g., rashes, eczema, acne) \_\_\_\_\_
- Musculoskeletal problems (e.g., muscle aches, stiff neck, swollen joints) \_\_\_\_\_
- Neurologic problems (e.g., numbness, weakness, headaches, paralysis) \_\_\_\_\_
- Psychiatric problems (e.g., depression, anxiety) \_\_\_\_\_

Family and Social History

Do any medical or eye diseases run in your family (e.g., diabetes, high blood pressure, cancer, glaucoma, macular degeneration)?

Yes  No  If YES, please specify: \_\_\_\_\_

# A guide to taking a patient's history

Lloyd H, Craig S (2007) A guide to taking a patient's history. *Nursing Standard*. 22, 13, 42-48.  
Date of acceptance: August 24 2007.

## Summary

This article outlines the process of taking a history from a patient, including preparing the environment, communication skills and the importance of order. The rationale for taking a comprehensive history is also explained.

## Authors

Hilary Lloyd is principal lecturer in nursing practice, development and research, City Hospital, Sunderland NHS Foundation Trust, Sunderland, and Stephen Craig is senior lecturer in nursing, Northumbria University, Newcastle upon Tyne.  
Email: hilary.lloyd@chs.northy.nhs.uk

## Keywords

#### **Assessment; Communication; History taking**

These keywords are based on the subject headings from the British Nursing Index. This article has been subject to double-blind review. For author and research article guidelines visit the *Nursing Standard* home page at [www.nursing-standard.co.uk](http://www.nursing-standard.co.uk). For related articles visit our online archive and search using the keywords.

TAKING A PATIENT history is arguably the most important aspect of patient assessment, and is increasingly being undertaken by nurses (Crumbie 2006). The procedure allows patients to present their account of the problem and provides essential information for the practitioner.

Nurses are continually expanding their roles, and with this their assessment skills. It is likely that history taking will be performed by a nurse practitioner or specialist nurse, although it can be done by any member of the team. The

be adapted to most nursing assessments. The history is only one part of patient assessment and is likely to be undertaken in conjunction with other information gathering techniques, such as the single assessment process, and nursing assessment.

History taking for assessment of healthcare needs is not new. Many nursing theorists have examined health deficits (Henderson 1966, Roper *et al* 1990, Orem 1995), all of which rely on careful assessment of patients' needs. Other nursing theorists identified interaction theories (Peplau 1952, Orlando 1961, King 1981), which sought to develop the relationship between the patient and the nurse through systematic assessment of health.

This article provides the reader with a framework in which to take a full and comprehensive history from a patient.

## **Preparing the environment**

The first part of any history-taking process and, indeed, most interactions with patients is preparation of the environment. Nurses can encounter patients in a variety of environments: accident and emergency; general wards; department areas; primary care centres; health centre clinics and the patient's home. It is important that the environment in practical terms is accessible, appropriately equipped, free from distractions and safe for the patient and the nurse (Crouch and Meurier 2005).

Respect for the patient as an individual is an important feature of assessment, and this includes consideration of beliefs and values and the ability to remain non-judgemental and professional (Rogers 1951). Respect also involves maintenance of privacy and dignity; the environment should be private, quiet and ideally, there should be no interruptions. When this is not possible the nurse should do everything possible to ensure that patient confidentiality is maintained (Crouch and Meurier 2005).

It is essential to allow sufficient time to complete the history. Not allowing enough time can result in incomplete information, which may adversely affect the patient's care.

## **Communication**

---

The importance of taking a comprehensive history cannot be overestimated (Crumbie 2006). The nurse should be able to gather information in a systematic, sensitive and professional manner. Good communication skills are essential.

Good communication skills are essential. Introducing yourself to the patient is the first part of this process. It is important to let patients tell their story in their own words while using active listening skills. It is also important not to appear rushed, as this may interfere with the patient's desire to disclose information (Hurley 2005). Developing a rapport with the patient includes being professionally friendly, showing interest and actively using both non-verbal and verbal communication skills (Mehrabian 1981) (Box 1).

Practitioners should avoid the use of technical terms or jargon and, whenever possible, use the patient's own words.

NURSING STANDARD

Patient medical report. Patient medical report example. Patient medical report pdf. Patient medical report format. Patient medical report sample.

Hospitals deal with a number of patients and guests every single day, which is why it is important to maintain a documentation and registration of each individual in the premises. One of the well-known documents is known as a new patient hiring form. This is used together with other documents that are completed by a patient or by the patient's authorized relative. It is also possible to see the medical intake intake modules for the evaluation of the patient intake modules from mycamoreincareredhealth.comDetailsfile formed: 450 kbdownload which is a new patient intake module? A new patient aspiration module contains the medical history of a new patient and other relevant information that must be relevant to disclose the patient's doctor. Although it is necessary to acquire any bit of medical information from the patient, the time assigned to fill in the form must be reduced and must not occupy too much from the hours of service of the staff once processed. The data disclosed will be collected in the hospital or clinic management system and will be held as a record for the patient. Perform new patient intake modules that there are several varieties of new forms of patient intake, and these are as follows: 1. family practice intake of new patients forming new patients assignment collects the patient's data that helps determine whether the patient has acquired his medical condition as someone in his family and relatives. The contents of the form include the patient's reasons for the visit, the patient's medical problems, the current drugs taken from the history of the patient, the family and the social, not the patient's health habits. The medical questionnaires of the sample are also found in form, in particular in the section of health habits to determine the dependence on the patient, the intake of food, the will, the preparation and the general safety. To identify the owner or user of the form, the patient's name is indicated in last area of form. Family practice New Patient Assumption Formholmdelhealth.comDetailsFile FormatSize: 443 KBDownload2. Medical pharmacy New Patient Intake Form There are medical pharmacies that offer adhesion options for their customers and buyers. With this, they present medical pharmacy new forms of patient intake to their buyers who are those who take the drugs they buy. The module contains general patient information, a questionnaire that will determine if the patient will allow the pharmacy to deliver the prescribed medication on request, as well as the patient's health and insurance information. Once the fields are completed, the patient or the buyer must sign up and submit the form to the pharmacy staff. Medical pharmacy New patient Formsixthavenuepharmacy.comDetailsFile FormatSize: 167 KBDownload3. Neurology New form of patient intakeCuring disorders and concerns related to an individual's nerves and the nervous system is the work of neurologists. These professionals use the neurology new patient recruitment module to acquire the basic identification of their patient, as well as the name of neurologists and patient care provider. Other details to reveal in this type of patient intake form include the patient's medical history, allergy list, drugs, family history and patient social history. Getting patient details, a neurologist will be able to address patient concerns and develop a medical plan to cure patient disease. You can also control mental health modules Neurology New intake format of the patient Formnsnae.comDetailsSize: 211 KBDownload Sections to be included in a new patient recruitment module Although there are intake modules promptlyonline that can be customized, it is always an advantage if hospitals and clinics will create their new patient intake module from scratch. with this, theThe sections to be included in the form are listed below to help anyone who will start creating their recruitment modules: 1. Patient Information This section must meet the full legal name of the patient, email address, contact information, age, residential address, and occupation. Most recruitment modules also have the patient's choice of emergency contact, whether it is his spouse, relative, and even a patient's company representative. In addition, the name of the person who addressed the hospital or clinic to the patient may also be indicated in the form to allow hospital staff to send a formal letter of gratitude in recognizing the services they offer to their clients.2. The current medical complaints are the place where the patient will be able to reveal his medical problems along with his descriptions and the date on which the incident occurred that has intensified due to the patient's injuries or problems related to the doctor. The list of doctors that the patient had previously visited for consultation is also indicated in this section, as well as activities that can trigger the disease. For a simpler section that the patient can fill in, a medical questionnaire can be incorporated in which the patient can immediately indicate his answers or in checkboxes. PAYMENT INFORMATION and clinics that do not allow admissions of patients before a payment is provided must include this section. In particular, this is focused on the identification of the individual or the part that will provide payment for the hospitalization and consultations of the patient. This section includes the name of the car and health insurance in which the patient is enrolled and the contact information of the insurance company. to have a ª.acidem ª.acidem airots id ekatnI tneitaP weNsmrof yrtnnevni htlaeh ees osla yam uoY .mrof ekatnI Äeht etelpmoc lliw tnemhsilbatse lacidem eht fo smret eht otÄ Ädeerga eh nehw yad eht fo etad eht htiw gnolaÄ Äerutangis sÂÂÄctneitap ehT .tneitap eht taert ot noitnetni sÂÂÄctneitap eht fo noissimrep detnarg eht setacidniÄ ÄnoitcesÄ ÄsihTtaert ot tnesnoCÄ Ä.8smrof tnemssessa noitirtun tuo kcehc osla yam uoY .tifeneb sÂÂÄctneitap eht rof desu eb ot noitamrofni fo ytilaindinfoc dna ,noissimrep erusolcsid ,snoitarepo erachtlaeh ,stnemyap dna tnemtaert sÂÂÄctneitap eht ot gnniatrep snoitalugerÄ Äeht etats lliw snoitidnoc dna smret ehT .sesimerp eht ni yats sih gnirud stÂÂÄcnod dna sod eht tuoba tneitap eht mrofni ot selur esuoh ro seicilop rieht etacidni tsum tnemhsilbatse lacidem eht ,tnemeerger ecnatpecca eht htiw noitcennoc nlseciton dna ,snoitidnoc ,smret ecitcarP .7smrof tnemssessa htlaeh ees osla yam uoY .emoctuo detcepze dna Stluser tluser ot ot ots lacidem eht fo ytcapac eht fo era the tneitap eht taht taht gnirussa rof laitnesse he sihtnemeerger ecnatpecca yar-X eht mohw ot etacidniÄ Äosla tsum noitazirohtua ehT .dettimda si ohw tneitap eht ot noitacdem dna ,tnemtaert ,erac edivorp ot tnemhsilbatse lacidem a gniwolla no sretnec sihT .tneitap eht yb dengis eb ot dednetni siÄ ÄtahtÄ Änoitazirohtua erac Anoitazirohtua eraC .5smrof gnilesnuoc tneitap ekil osla yam uoY .yrotsih ylimaf dna ,stibah htlaeh ,sisongaid ycnangerp sÂÂÄctneitap eht edulcni yrotsih lacidem eht fo saeraÄ ÄrehtO .tneitapÄ Äeht fo metsys eht ni tneserp sgurd lacidem eht segdelwonka naicisyhp gndnetta eht taht erussa ot desolcsidÄ Äeb osla lliw seigrella noitacdem sÂÂÄctneitap eht dna ,nekat yltnerruc eraÄ Ätaht stnemelppus dna snimativ ,etad noitanimaxe laci SYHP Formcarolinapaincenter.netDetailsFile FormatSize: 8 MBDownload New intake patient Formalamancechiropractic.comPictureSize: 9 KBDownload The importance of new patient recruitment modules New forms of patient allow medical personnel to acquire the patient's personal information that will be used to establish a medical report and register in their database. In addition, the module is also an important tool that protects the hospital and clinic from passive and obligations as it contains general agreements and patient consent statements. The medical industry is one of the most important industries for humanity. Without the correct prescription of a doctor or doctor; diseases, diseases and injuries will not be cured at the right time. The doctor will have to complete a medical form as documentation for the patient's condition. A medical form should contain the prescriptions, notes of the doctor, and examinations that the patient will have to take. There are a lot of types of medical forms, such as a Waiver medical form that must be signed by the patient's relatives before undergoing surgery, and a medical release form for the granting of authority in releasing patient information. person who asks this form to ensure that his players are well rounded, fit, and ready to win the competition. Emergency medical release form - this release form will indicate contact details of people to call whenever there are emergencies that will involve patient conditions. This also states the medical protocol that both parents and health care providers agreed in case the patient requires immediate medical action. Medical Treatment Authorization Form - This authorization form focuses on the specific treatments that the Health Provider or Person authorized will allow doctors to provide to the patient. They may assert if they consider having surgery for the patient, require him to take capsules, or limit his number of antibiotics prescribed per day. Emergency medical releasepeacelutheranstl.orgDetails File format Size: 136 KBSload Emergency Release Medical Releasepopshouston.orgDetailsSize: 136 KBScharging Emergency Contact and Medical Release Medicaws.comSickle FormatSize: 178 KBDownloadMinor Medical Release AuthorizationMedical release: name of the authorized person. This can be the name of the patient's parents and guardian. It is important that this field will be answered if the condition of the patient is due to hereditary reasons. If you are a guardian, the Healthcare Provider will require a legal identification document that will demonstrate the guardian's relationship with the patient. If the names of both parents are indicated in this field, the Health Care Provider may or may not request additional documents unless there is a separate marriage case that will affect only a minor information release form/children. Address. This refers to the full address of the authorised person. The Health Care Provider may grant a choice of whether to release the medical form at their office or send the form to the address indicated on the release request form. Contact number. The authorized person should be able to provide a minimum of two sets of contact numbers to ensure that the Health Providers will be able to reach it when there are requests and a necessary validation. Medical conditions. This is often in a form of a table where the authorized person lists the previous and current medical conditions of the patient. The year in which the patient has been admitted for medical help must also be indicated to make the patient's health details known to the medical staff or doctor. Patient allergy. Food, medication, beverages and any type of allergies should also be included to help your doctor know the right medicine that the patient will take so as not to cause allergic reactions. Treatments and Drugs Prescribed. This field focuses on any current medicine that the patient is maintaining in prevention for a particular disease or disease. This may include specific types of vitamins and dietary supplements. Emergency contact. There should be two names to indicate as an emergency contact in which the patient requires immediate response and the primary authorized person is far from the position of the medical clinic. Name of the doctor. The authorised person shouldThe full medical name of the doctor who requested the patient's medical records. A surgeon, a dentist or even a nurse may also be declared if they are those that require information. If you are a parent or guardian to whom your relative's medical reports have been asked, then these modules will help you pass through the process. Just choose which format fits your purpose and download it to be your base to create the module. We
